## Projects & Seminar

### BE project on " Investigation of Solar Based Physical Heat Transfer Mechanism"

- We aim to use the Available solar energy with The help of Solar collector for Vapour Absorption refrigeration system.
- We are working on heat transfer mechanism working on solar energy, as we have large amount of solar energy available we can utilize it for our convenience.
- As this energy is very clean and abundant we chose solar energy hence we are trying to run heat transfer mechanism.

### T.E SEMINAR "Desalination of salt water using Renewable energy sources."

- We have abundant amount of renewable energy available, we can use that energy to convert salt water to potable water.
- This energy is very clean energy hence we chose renewable energy as compared to traditional energy.
