Projects

Minor project

Project Title : Single wheel self-balancing Skateboard

Description : The skateboard is an electro-mechanical device which works on the measurement of the tilt angle and speed as per the riders movement.

Role : Procurement and Designing

Team Size : 7

Hardware : DC Motors, Gyroscope and Gears and other basic materials

Software : Arduino, IMU

Result : Team Work Appreciated and I was awarded 10/10

Major Project

Project Title : Designing and Development of SMA based XYZ

Description : As temperature increases, the shape memory effect comes into picture. Due to this the springs will contract and expand and hence the position of the end effector will change causing the milling operation to take place.

Role : Procurement, Designing and Assembly

Team Size : 3

Hardware : SMA Springs, Bearings, 3D Printed Parts

Software : Solid Works
